

# Public Sector Finance Seminar

FUNDETEC – Funding Environmental Technologies  
Berlin, 31 MAY 2007

# FUNDETEC OBJECTIVES

- Identify existing mechanisms used to fund environmental technology development.
- Compare and assess funding schemes for the development of new activities and investments in environmental technologies.
- Identify obstacles that technology developers and users face when trying to fund investment in environmental technology development.

# FUNDETEC OBJECTIVES

- Determine whether such obstacles are generic to all innovative technology development, or only to environmental technology.
- Determine whether commercial investment in innovative technology differentiates between environmental technology investments and other investments, and if so on what basis.

# FUNDETEC OBJECTIVES

- Measure and assess the performance of existing funding mechanisms and schemes, identifying constraints and solutions.
- Identify innovative instruments and examples of excellence in funding environmental technology development, including public and private funding mechanisms, public-private partnerships, and regulatory or structural incentives.
